

SAFETY

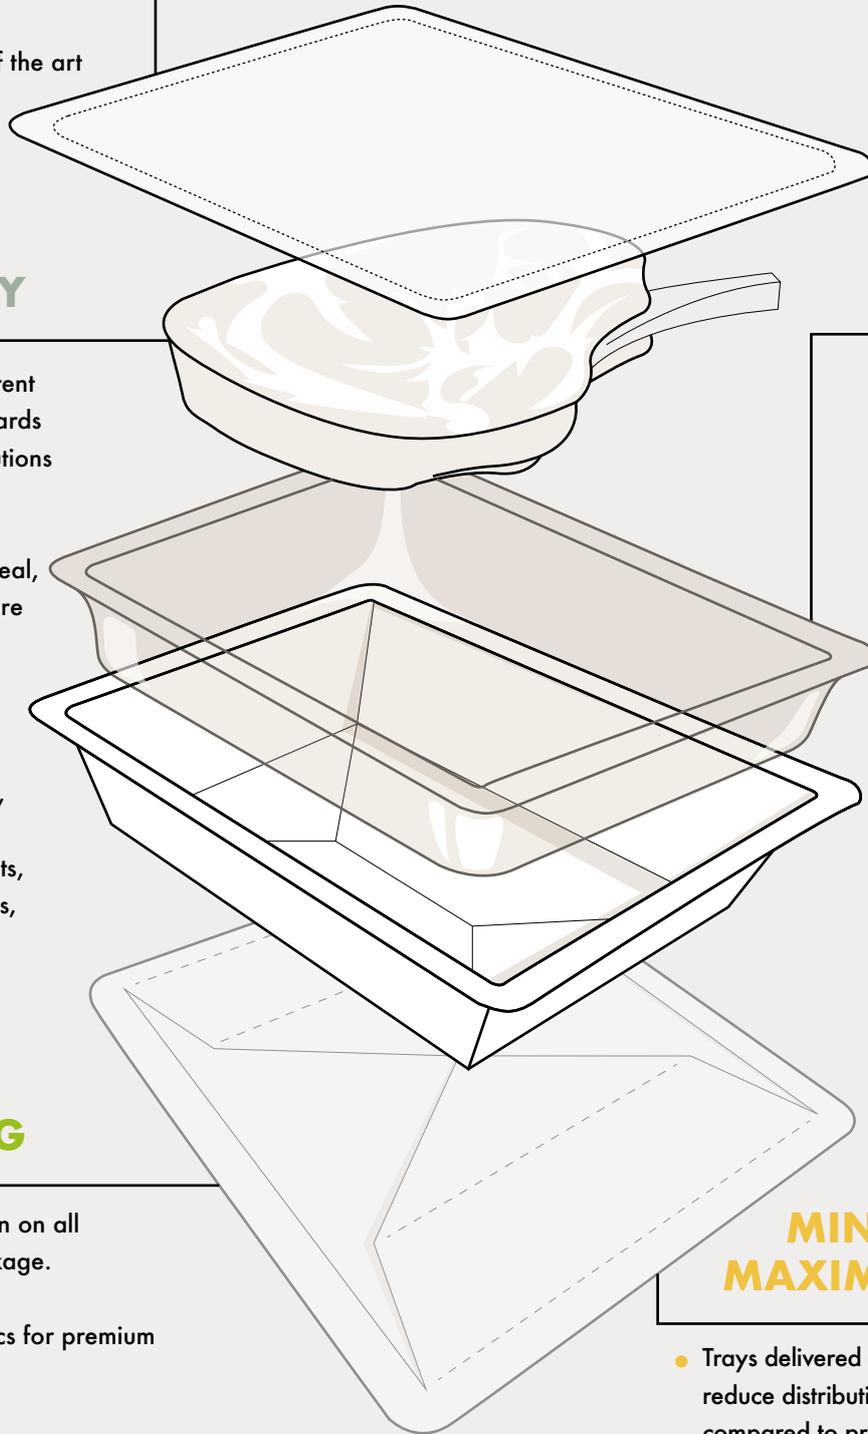

- Unique process to generate perfect sealing surface.
- Guaranteed state of the art seal integrity equal to traditional plastic packaging.

FLEXIBILITY

- Availability of different liners and paperboards offers technical solutions to suit any product.
- Presented for Top Seal, Modified Atmosphere and Vacuum Skin formats.
- Recommended for cheese, fresh meats, processed meat, ready-made products, frozen foods, snacks, salad and fruit.

FULL BRANDING

- 360° Communication on all surfaces of the package.
- High quality graphics for premium branding design.
- Flexibility on communication formats with printing and/or labelling.

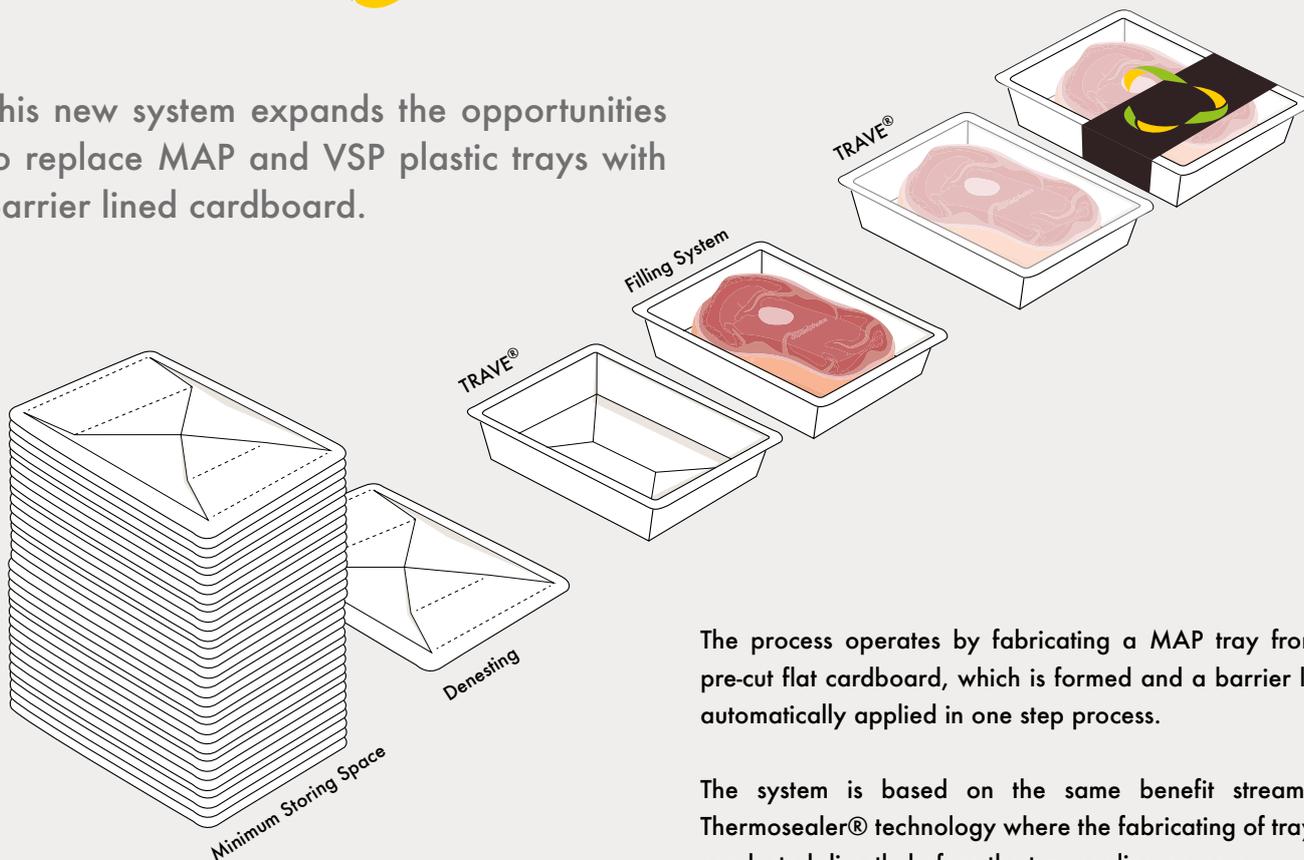

**80-90%
LESS
PLASTIC**

- Liner forming station with ZERO technology eliminates all process waste.
- Easy Separation of liner from paperboard for simple and efficient recycling at end of life.

**MINIMUM SIZE
MAXIMUM SKILLS**

- Trays delivered as flat boards significantly reduce distribution storage costs compared to premade trays.
- Liner forming with Zero waste technology reduces cost of final package.
- Reduced inventory with availability of smaller purchase quantities.

This new system expands the opportunities to replace MAP and VSP plastic trays with barrier lined cardboard.

The process operates by fabricating a MAP tray from a pre-cut flat cardboard, which is formed and a barrier liner automatically applied in one step process.

The system is based on the same benefit stream as Thermosealer® technology where the fabricating of trays is conducted directly before the tray sealing process.
