

# THE GLOBAL SUPPLY CHAIN GUARDIAN

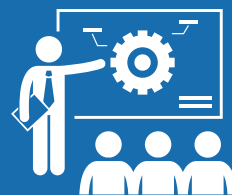

We secure your supply chain through our

## SD+ 4-STEP PROCESS

**CONSULTING**

**TRAINING**

**MONITORING**

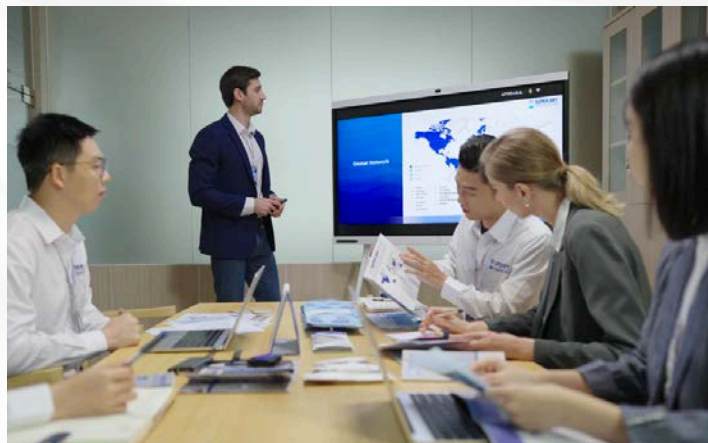

**TESTING**

## SD+ Consulting

Our consultants support your factories in detecting moisture damage risks on site. We check the factory facilities and provide you with a step-by-step improvement plan to minimize moisture damage risks at the source.

## SD+ Training

We provide supplier seminars and customized training for your staff. Our holistic approach raises risk awareness at every staff level, pin-pointing on-site risks and highlighting moisture damage prevention solutions.

## SD+ Testing

Our climate chambers test how your products and packaging withstand varying weather & climate conditions during transport and storage. We provide you with valuable insight to make your supply chain more resilient against moisture risks before real damage can occur.

## SD+ Monitoring

We measure and analyze the temperature and humidity levels inside containers and packaging during shipment and storage revealing hidden moisture damage risk and providing you with customized improvement measures.
